

## **VACANCY : Sand blaster**

### **About De Bruyn NV**

De Bruyn Coating is a strongly growing and creative organisation that is active in protecting and providing colour to the products of our clients. Our clients are typically industrial companies working in construction, machine building, transport etc. Already over 37 years, we built a very good reputation in Belgium and abroad.

Working at De Bruyn means collaboration, accepting challenges, continuous learning, seizing opportunities, come up with solutions and continuously trying to do better and smarter. This you will do with the rest of the 20 people team..

At this moment we have a vacancy in our team for :

### **Sandblaster (38h)**

#### **What is this job about ?**

Our sandblasters remove the corrosion and other contaminations of our clients' products. This is a crucial step to be able to apply the paint in a qualitative way later on. Sandblasters work autonomously in their cabins.

#### **What are the responsibilities?**

- Prepare and attach the products correctly
- Sandblast the products according to the desired end result
- Clean and maintain cabin, tools and machines on a daily basis
- Use the appropriate protective measures

#### **What do we offer you ?**

- Balanced salary package in line with your experience and capabilities
- Trainings
- A nice team to work with
- Flexible hour scheme
- The right tools and working clothes

#### **This role requires :**

- A lot of desire to do this job both qualitatively and output wise
- Desire to learn via trainings and direct on the job feedback
- Willingness to contribute yourself to the improvements in the company

#### **Are these your qualities ?**

- Preferrably some experience but this is not a must
- Being accurate
- Good physical health
- Being able to work autonomously

Send quickly your resumé and cover letter to :
